## Lab-metal

*repair and patching compound*

- Aluminum-filled, ready-to-use dent filler and patching compound
- Spreads like paste, hardens into metal
- Permanent, powder-coatable metal repairs
- Fills dents, voids, pits in metal & non-metal parts
- **Hi-Temp** version withstands temperatures to 1000°F
- Seals, patches & smooths cracks, pinholes, welded seams
- Thin with Lab-solvent (for brush and spray applications); add a capful of Lab-solvent to unused contents for extended storage
- Used by metalworkers, auto restorers, fabricators, welders since 1950

Available through automotive, industrial and welding supply distributors.
