## Lab Metal 450

### TECHNICAL DATA

---

#### Description

- "LAB METAL 450", product code 10106, is a ready-to-use repair and patch compound recommended for use under coatings requiring high process temperatures.
- This product is especially recommended for powder coatings.
- Use "LAB METAL 450" to fill and repair metal defects under powder coat colors where color stability is required.
- "LAB METAL 450" will not yellow under the powder coating.

#### Heat resistance

- -40° to 450°F

#### Color

- "LAB METAL 450" is aluminum filled and is light gray in color. Metal gray when buffed.

#### Adhesion

- Excellent adhesion to pretreated CRS, and aluminum, including zinc plating.

#### Wet Weight ~ 50.0 gm per oz(fl.)

- 1 Gal = 14.0 Lbs.
- 1Qt = 3.5 Lbs.
- 1 Pt = 1.75 Lbs

#### VOC

- 3.0 Lbs./gallon coating

#### Conductivity

- Will accept ground for powder coating.

#### Mechanical

- Can be milled, sawed, drilled, tapped, sanded, and filed.
